

Zainab Khan

Caught in the Elevator

Script: Hi! It's a pleasure to meet you. My name is Zainab Khan and I studied Computer Science at UT Arlington with a minor in Mathematics. Skills that make me stand out include a hard work-ethic, thinking outside the box, and persistent leadership. One of my biggest accomplishments was creating a library used by over 50,000 people. I feel like I would be a great candidate for this job because of my proficiency in multiple programming languages, experience with software testing, and soft skills such as working with others and effectively communicating.
